

1st Month Course Outline for Corvit Systems Peshawar

Web Designing (HTML, CSS, JS)

WEEK 1 — HTML (Basic → Intermediate)

Class 1: Introduction to Web & HTML

- What is Web Designing & Web Development
 - How websites work (servers, browsers, HTTP requests)
 - What is HTML? Why do we use it?
 - HTML Document Structure (`<!DOCTYPE html>`, `<html>`, `<head>`, `<body>`)
 - Creating first webpage
 - Headings `<h1-h6>`
-

Class 2: HTML Basic Tags

- VS Code setup
 - Paragraphs `<p>`
 - Line breaks `<br/>`
 - Comments
 - Bold, Italic, Underline tags
 - Horizontal line `<hr>`
 - Semantic importance
-

Class 3: Links & Images

- Anchor tag `<a>`
 - Internal vs external links
 - Opening links in new tab
 - Image tag `<img>`
 - Image attributes (src, alt, width/height)
 - Image optimization best practices
-

Class 4: Lists & Tables

- Unordered list `<ul>`
 - Ordered list `<ol>`
 - Description list `<dl>`
 - Tables: `<table>`, `<tr>`, `<td>`, `<th>`
 - Table attributes (border, width, colspan, rowspan)
-

Class 5: Forms & Inputs

- `<form action="" method="">`
 - Input types: text, email, number, password, date, file
 - Labels
 - Textarea
 - Checkbox & Radio buttons
 - Select dropdown
 - Submit & Reset buttons
 - Basic validation attributes
-

WEEK 2 — CSS (Basic → Intermediate)

Class 6: Introduction to CSS

- What is CSS, why is it used?
 - Types of CSS: Inline, Internal, External
 - Selectors (element, class, id)
 - CSS comments
 - Basic styling (color, background-color, width, height)
-

Class 7: Box Model & Display

- Margin, Padding, Border
 - Content-box vs Border-box
 - Display types: block, inline, inline-block
 - Box sizing
 - Practice: create card box
-

Class 8: Typography & Colors

- Font-family, font-size, font-style
 - Google Fonts
 - Color system (HEX, RGB, HSL)
 - Line-height & letter-spacing
 - Text shadow
 - Responsive text
-

Class 9: Positioning & Floats

- position: static, relative, absolute, fixed, sticky
 - top, left, right, bottom
 - z-index
 - Float & clear
 - Real-life examples
-

Class 10: Layouts & Flexbox

- What is modern layout?
 - Flexbox container & items
 - Properties:
 - justify-content
 - align-items
 - flex-direction
 - gap
 - Mini project: navigation bar
-

WEEK 3 — CSS Advanced + Responsive Design

Class 11: CSS Grid Layout

- Grid container properties
 - Grid-template-columns / rows
 - Gap
 - Placing items
 - Practice: Grid gallery
-

Class 12: Transitions & Animations

- transition-property
 - transition-duration
 - Keyframes
 - Basic animations (hover effects)
 - Button hover project
-

Class 13: Responsive Web Design (RWD)

- What is responsive design?
 - Media queries
 - Mobile-first approach
 - Breakpoints
 - Flexible units (% , vh/vw, rem/em)
-

Class 14: CSS Best Practices

- Reusability
 - Class naming
 - BEM methodology (intro)
 - File structure
 - Clean CSS approach
-

Class 15: Mini Project – Responsive Landing Page

- Create homepage using:
 - Flexbox
 - Grid
 - Media queries
 - Header + Hero section
 - Footer
-

WEEK 4 — JavaScript (Basic → Intermediate)

Class 16: Introduction to JavaScript

- What is JS and where is it used?
 - How to add JS (inline, internal, external)
 - `console.log()`
 - Commenting in JS
 - Variables: `let`, `const`, `var`
 - Data types
-

Class 17: Operators & Conditions

- Arithmetic operators
 - Logical operators
 - Comparison operators
 - `if / else`
 - `else if`
 - practice: basic calculator logic
-

Class 18: Functions & Events

- Function declaration
 - Parameters & return
 - DOM events: `click`, `mouseover`, `input`
 - Event listeners
 - Practice: button click to change text/color
-

Class 19: DOM Manipulation

- Selecting elements (`getElementById`, `querySelector`)
 - Changing text & styles
 - Creating & removing elements
 - Form handling
 - Simple JS project
-

Class 20: Final Mini Project (HTML + CSS + JS)

Students will build a complete interactive webpage such as:

- To-Do App
- Calculator
- Image Slider
- Form Validation App
- Responsive Website with JS navbar
